

Infinity Stone: the perfect solution for large areas

Nearby Zurich (Switzerland) in March 2011 inaugurated the new headquarters of Meier's Garden Center, the reference point in that district for the world of gardening. In an area of over 20,000 sqm you can find beautiful flowers, plants of all kinds, garden furniture and furnishings.

The whole area was laid with material Infinity Stone of Gardenia Orchidea, colour gray and size 60cm X 60cm. That large size contributes to improving the environment, creating a special softness and naturalness effect.
